

Coffee Cup Sleeves

The cheapest piece of branding a café buys.

Corrugated E-flute sleeves that make a hot cup holdable without double-cupping. The flute traps a layer of air between hand and cup, so the same sleeve that protects the customer also cuts your cup consumption. Supplied pre-glued and flat-packed, in kraft brown or white, plain or printed with your logo across the full wrap.

Also known as: Cup sleeve · coffee clutch · cup jacket · corrugated cup sleeve · hot cup sleeve
